What are the deadlines for Graduate Applications?

-Applications for Fall Semester:
  Application deadline is January 15th
  Applications received after that date may not be considered for funding

-Applications for Spring Semester:
  Application deadline is October 15th
  Applications received after that date may not be considered for funding

Exceptions:

- **Inside the US** (not involving I20/visa papers)
  - **Fall applicants**: We will continue to review your applications through mid-summer
  - **Spring applicants**: We will continue to review your applications through late November

Note: Applicants who have graduated from an ABET (Accreditation Board for Engineering and Technology) accredited engineering program do not need to submit GRE or TOEFL scores

- **Outside the US**
  - If you require I20/visa papers:
    - **Fall applicants**: We will continue to review your applications through early summer but application completed late may not be processed fast enough for you to complete travel papers. Accepted applicants who are accepted when it is too late to prepare to come can be deferred to either the following spring or fall.
    - **Spring applicants**: We will continue to review your applications through early November but late application may not be completed fast enough you to have travel papers prepared. Accepted applicants who are accepted when it is too late to prepare to come can be deferred to either the following fall or spring.

- **PhD Applicants**
  - The fall deadline of January 15 and spring deadline of October 15 are specifically crucial for PhD students wishing to be considered for a TA position. Your application and payment must be submitted on or before January 15/October 15, but documents can come to us after that date. The documents should be sent to your credentials vault as soon as possible but the January 15 deadline doesn't have to be adhered to for documents. The sooner your application is complete as a PhD student the better your chances of being considered for a TA or an RA position.
