I just received a notice that a fee has been added to my account.

What is the fee for?

When you register for a course that requires a lab kit, Student Accounts will automatically add the fee for the lab kit to your account. Lab kits provide materials and tools that help in the creation of a tangible end product retained by the student.

To view which courses need lab kits, see the descriptions in the “Class Schedule Listings” on BU Brain.

If you need assistance finding the course listings, see the navigation on the left side of our undergraduate web page and click “Course Listings” for a “how to” document.
