Professor Yu Chen -- certified by the National Security Agency (NSA) and the Committee on National Security Systems (CNSS)

Watson School Associate Professor Yu Chen, Department of Electrical and Computer Engineering, attended the recognition ceremony as Binghamton University programs were certified by the National Security Agency (NSA) and the Committee on National Security Systems (CNSS). CNSS 4011 and 4012 Recognition are standards for information security professionals who assist federal agencies and private sector entities to protect their information and aid in the defense of the nation's vital information resources. Expertise translates into student learning and groundbreaking research in cyber security and information assurance.

Certification supports our cooperative venture to establish a Center of Excellence in Information Assurance Education led by Distinguished Service Professor Victor Skormin along with faculty members in the Watson School’s Department of Electrical and Computer Engineering, and the Department of Computer Science plus the Binghamton University School of Management and SUNYIT at Utica/Rome.
