**Grade History**

The Grade History can be accessed by clicking the Reports button and choosing View Grade History from the menu.

The Grade History can be a bit clunky as the only way to query it is by a time frame. You cannot query just the Grade History of a particular student or assignment. You get all students and all assignments for the time frames that are as shown below.

**Grade Details**

Use the contextual menu to access grade details, add comments to that grade or exempt that particular grade.
