Languages Across the Curriculum (LxC) is offering a new course tailored for students who wish to use their existing world language skills to enhance their knowledge of chemistry and gain valuable cultural insights. Students in LxC 150 apply their world language abilities to further explore areas of interest from their CHEM coursework, and develop intercultural competencies relevant to their academic & professional pursuits.

In this innovative course students will become better equipped for real-world intercultural communication, collaboration, and problem-solving which the American Chemical Society (ACS) recognizes as integral to professional development.

LxC 150
• is open to students who have already taken (or will take in Spring 2022) ANY of the following: CHEM 104, CHEM 107, or CHEM 111.
• allows students to use: French, Italian, Portuguese, or Spanish (This isn’t a language course; use your existing skills in new ways!)
• relevant to all 4 Chemistry tracks (BA/BS)
• is open to both CHEM majors and non-majors
• can accommodate first-year & advanced students
• can fulfill Harpur W using chemistry!

LxC 150: CHEM thru World Language & Culture (2-credits)

SPRING 2022
Thursdays, 2:50 - 4:15
Use your knowledge of French, Italian, Portuguese, or Spanish
